## HOW DOES THIS OPENER/HEADLINER WORK?

I'm going to pull back the curtain a little bit and let you all know that DJing weddings, if you're doing it the way that it SHOULD be done, are a lot of work! There are a number of skills a great wedding DJ needs to possess beyond the ability to play music and make people dance (although that's still my personal favorite). Bringing enough gear, knowing where to put it, understanding how to use it effectively, MCing, and problem-solving on the fly are all skills a talented wedding DJ needs to possess. It's no wonder that there are so few truly great ones and so many BAD ones. So how do we make sure that your experience is extraordinary? We divide up the work!

When you hire Bass & Bliss to provide the entertainment at your wedding, you have the option of hiring a TEAM to ensure that your day runs smoothly, sounds awesome, and most importantly is a ton of fun! That team includes:

- **Myself**: Yes, even if I - the head of the company - am not personally part of your DJ team, I will be here to answer questions, provide inspiration, and help make sure your planning process is smooth and your music is perfect
- **An Opener**: Just like a good festival has stellar opening acts to get the crowd pumped and set a killer tone, your opener will make sure your wedding day from ceremony until the start of your dance floor runs smoothly and has a killer soundtrack
- **A Headliner**: Most DJs don't want to do weddings or, at the very least, don't enjoy doing them; that's just a fact and there's no need to hide that from you. But allow a DJ to come in and rock your dancefloor and all of a sudden more of them are interested! Your team includes a killer DJ who's main priority is to come in for your dance at the end of the night and just CRUSH IT.

"Alex (Updike) was truly the best possible DJ/MC we could have asked for! Music was a big priority for our wedding so from our first call with Alex we knew we were in great hands! He made the planning process super easy and fun with the online portal, and he was always super responsive and easy to talk to if we had any questions. He covered every little detail in our planning meeting and everything was perfect on the day! From the ceremony to cocktail hour to the reception and after party, everything flowed so well and we had so much fun! He was so great at reading the crowd during the dance and somehow made all of our random requests work too! Thank you Alex/Bass & Bliss for making our wedding so incredible!

"We had Sean DJ our ceremony, cocktail hour, and reception and he was awesome! Very professional and entertaining! All of his set ups were discrete and he was very accommodating to our music choices and made the day SO FUN! I would highly recommend Sean and Bass and Bliss for your events!"

---

Holy MOLY. Alex (Updike) was PERFECT in every single way as a DJ and a MC. He made the planning process so fun and made it very clear he is not the traditional DJ.. and we loved that! Everyone was talking about how good the music was and he truly nailed our vibe so perfectly.

## THINGS TO CONTEMPLATE

QUESTIONS TO ASK YOURSELF WHEN COMPARING US TO YOUR OTHER OPTIONS

1) Did the other company/DJ meet (or offer to meet) with you face-to-face?

\*\*\*

2) Did they communicate with you effectively and answer questions or inquiries in a timely manner?

\*\*\*

3) Were they personable? Or did everything they send you seem like an automated or canned response?

\*\*\*

4) Did they offer anything like our client portal? Is their planning process simple and straightforward?

\*\*\*

5) Do you know who your DJ will be on the day of your wedding? Or are they assigned after booking?

***A Ford Focus and Tesla Model X are both cars that will both get you from point A to point B, but open up the hood and they are vastly different machines.***

***Different companies may seem similar on the surface, but not all DJ companies are created equally.***
